

Gen Pop experience with VACCINES

Vaccines are a key part of the general public's fight against infectious threats. MD Analytics conducted a study asking 1000 Canadians and 1000 Americans about their vaccinations over the past year.

In the last 12 months, most American and Canadian adults say they have received at least one vaccine.

Among those vaccinated, the most common vaccines overall were:

Where were they vaccinated?

Among older adults (aged 55 and older) other common vaccines include:

Data based on a survey conducted across the United States (n=1000) and Canada (n=1000) among the general population aged 18 and over, recruited in February 2024.
